## **Discover Scuba Diving**

“Try dives” vary from school to school in terms of what is provided and offered. Our approach is to provide a full service so that you can really decide whether scuba diving is for you.

So, rather than putting some ill fitting equipment on your back and dragging you around the water for a few minutes, we ensure that the equipment is in the correct size, and explain how the equipment works.

When you are ready we then take you into the pool and your first breath underwater. If you choose to, you can proceed to some of the skills that would be required of you should you choose to continue to the PADI Scuba Diver or PADI Open Water courses.

The PADI Discover Scuba Diving programme is designed to introduce people in a highly supervised but relaxed manner to scuba diving. As a result can be a great help to a family who wants to dive together, or for a more nervous diver who wants to "put a toe in the water".

If after the dive, you find that it was as good as we say (and we know you will) then you can transfer over to the full open water course at a reduced fee. Also the dives from this course will count towards your final qualification. When you participate in a Discover Scuba Diving program, you discover excitement and adventure - freedom and serenity. Nothing compares to the "weightless" exhilaration of breathing underwater. Only a diver knows the feeling!
