PADI Speciality Courses

We can offer a number of PADI speciality course so that you can extend your experience and even work towards obtaining your Master Scuba Diver rating if you wish. To become a Master Scuba Diver, you need to be a Rescue Diver, completed five speciality courses and have logged a minimum of 50 dives.

Here are a few that we offer. If there are any that you are interested in that are not listed here, please just ask and we will see what we can arrange for you.

Our courses include all required materials.

PADI Peak Performance Buoyancy

Float effortlessly, drifting over reefs. Be the diver you want to be, with ultimate buoyancy control, able to hover close to the bottom and examine underwater organisms without touching them.

Buoyancy skills separate the good divers from the *great* divers. In the Peak Performance Buoyancy Specialty course, you will learn to how to precisely weight yourself for optimum control, poise and balance. You learn to ascend and descend so effortlessly, it seems like you only think about it and it happens. By mastering streamlining, you move through the water cleanly, efficiently and gracefully. You swim near fragile environments without harm to them or yourself.

- Must be a PADI Open Water Diver or Junior Open Water Diver certification (or qualifying certification from another organization) and 10 years old.
- Number of dives: Two
- Buoyancy fundamentals, weighting and adjustments
- Streamlining, balance and trim
- Fine tuning buoyancy and mastering hovering
- Certification counts toward the PADI Master Scuba Diver rating.
- Cost £80.00

PADI Underwater Navigator Course

Be the diver everyone wants to follow and make your sense of direction legendary with the PADI Underwater Navigator Specialty course. When everyone's buzzing

Donkey Divers

about a reef or checking out a wreck, they're having a great time – until it's time to go. Then they turn to you, because as a PADI Underwater Navigator, *you* know the way back to the boat.

Underwater navigation can be challenging, but in the PADI Underwater Navigator Specialty course, you master the challenge. You learn the tools of the trade, including navigation via natural clues and by compass. You learn to estimate distance underwater, follow navigation patterns and know where you are while following an arbitrary, irregular course using the Nav-Finder.

- Must be a PADI Open Water Diver or Junior Open Water Diver (or qualifying certification from another organization)
- Number of Dives: Three
- Navigation patterns, natural and compass navigation
- Following irregular courses with the Nav-Finder
- Dive site relocation
- Certification counts toward the PADI Master Scuba Diver rating.
- Cost £110.00

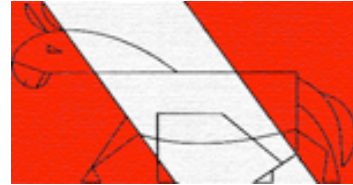

PADI Enriched Air Diver

This is one of PADI's most popular specialties – the PADI Enriched Air Diver course. Diving with enriched air nitrox lets you safely extend your no stop time beyond the no-decompression limits for air. Diving with enriched air means more time underwater – but you need to be certified as an Enriched Air Diver to get enriched air fills.

Whether you're into underwater photography or wreck diving, on vacation in some tropical paradise or just out for a leisurely day of diving at your local dive site, the PADI Enriched Air Diver course helps you get more out of diving by giving you more time underwater.

- Must be a PADI Open Water Diver (or qualifying certification from another organization).
- Number of dives: Two
- Learn to analyze cylinder contents.
- Plan enriched air dives using tables and dive computers.
- Safely increase your no stop time.
- Certification counts toward the Master Scuba Diver rating
- Cost £160.00

Donkey Divers

AWARE Coral Reef Conservation

The AWARE - Coral Reef Conservation Specialty course teaches divers, snorkelers and non-divers about the vital role of coral reefs in the marine environment. The course also familiarizes participants with the current state of the world's coral reefs and how they can help.

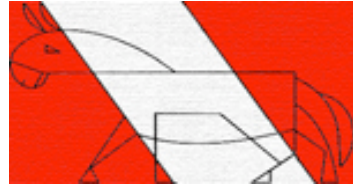

- No dive certification required
- No minimum age limit
- Non-diving course
- Cost £60.00

This “dry” course includes:

- An introduction to Project AWARE
- The importance of coral reefs to marine ecosystems and coastal areas
- Coral reef biology, association and competition
- The status of the world's coral reefs
- How participants can help, including responsible diving and snorkelling practices.

You can use this course to complement your Peak Performance Buoyancy, AWARE - Fish Identification, Underwater Naturalist or Underwater Photography Specialty course. In addition, the AWARE - Coral Reef Conservation Specialty course counts as one of five Specialty course certifications required for the Master Scuba Diver certification.
