INTOVA

EDGE X

Waterproof 1080p HD
POV Sports Camera

RRP £259

Intova's long history of producing waterproof action cameras culminates with **EDGE X**: a new standard in high quality **Point of View** (POV) models with unique features and top performance.

Compact and full featured, EDGE X offers **1080p High Definition** video up to **60 frames per second** with a **160 degree** wide angle lens. This design allows the maximum view angle without the significant distortion found in wider lens angles. The EDGE X has a **60x digital zoom** and can also take **12MP Still Photos**. The EDGE X has a flat **optical-glass lens port** with **water-repellent** and an **anti-reflection coating** making it great for all conditions.

Built in Wi-Fi allows the user to operate and see what is on the viewfinder remotely on a laptop, tablet, or smart phone and also to enable **wireless file transfer**. EDGE X supports Micro SD card up to **64GB** (Class 10 required for 1080P HD video).

Intova's unique and patented **Unibody design** builds the electronics directly into the compact housing. The housing is constructed of **rugged polycarbonate** with **rubberized armour coating**. The optically flat glass lens port has a water repellent and anti reflective coating. Its flat design allows seamless operation above or below water. **Waterproof to 60m**, the housing includes buttons for **full function camera control** in any environment.

EDGE X's high quality **LCD screen** acts as both a viewfinder and playback monitor. To save battery life, the LCD can be turned off when not in active use. The EDGE X also has a **rechargeable and removable Li-ion battery**.

EDGE X utilizes a **standard 1/4" tripod thread** to fit a wide range of Intova mount accessories.

Shooting **hands-free video** shouldn't be limited to just a few sports. Intova offers a **full system of mounts** (items sold separately), specifically tailored for a full range of activities and interests. From helmet mounts, handle bar mounts and tripod connections to ski, skate, motocross, and white water attachments.
